

How-to Update i-DesignR Rhinestone Library

1. Rename the existing library “Graphtec Rhinestones” to something else, like “Graphtec Rhinestones Original”. It should be located in “Clip Art” folder:

For Example: C:\i-DesignRCESeries\ClipArt

2. Create a new folder named “Graphtec Rhinestones”
3. Download the ZIP file
4. Unzip into the newly created “Graphtec Rhinestones” folder
5. The rhinestone library with the enhanced cut sizes is ready to use.
